ACCESS CONTROL

IXP20 **SYSTEM.**

product information
FOR ENDUSER

convenience at my **FINGERTIPS**.

Be it the home or office, the IXP20 Access Control System with its modern and sleek design, will compliment the aesthetic appeal of any building while offering class leading security and control. The IXP20 provides Impro Technologies' tried and tested Access Control proficiency, taking you into the future with complete peace of mind.

With the IXP20 system, Access Control is no longer reserved for the industrial or enterprise market. Everything you need to secure your premises is at your fingertips thanks to the implicity of the touch screen and web application. With two controller options to choose from and reader options to fulfil all applications the IXP20 offers a solution that will meet both your requirements and your budget.

Up To **8** Anti-Passback Doors
Up To **1 000** Tagholders
Up To **5 000** Buffered Transactions

APPLICATIONS

The IXP20 will bring control to the digital age. With connectivity over the internet or on a local network real-time control has never been easier.

- Small Commercial
- Upmarket Residential
- Boutique Hotel
- Bed & Breakfast
- Remote Site Management
- Holiday Rental Property
- Production Management

FOR CONTROL OF

- Staff
- Contractors
- Visitors
- Vehicles
- Time clocking using fingerprint

The IXP20 offers standards reports that turn your access control system into a business tool.

THE STANDARD REPORTS ARE AS FOLLOWS:

- Hours Worked – calculates hours worked per Tagholder based on In & Out transactions of an APB Zone
- Access – lists who accessed an area & type of event occurred (denied entry/ allowed) with their tag code
- Status – lists the doors and controllers and events that occur on site (powered up/forced entry etc)
- Audit – listing of admin-istrative transactions that occurred (adding or deleting of tags etc)

NOTE: All reports can be exported as a CSV file.
