**1, 2 and 4 loop, networkable,  
multi-protocol, analogue  
addressable fire alarm control panel**

### Product Overview

The Morley-IAS DX Connexion panel is ideally suited for use in the protection of small to medium sized buildings. All in all, a compact, high performance, feature rich, economical fire alarm control panel designed to help both the installer and the end user.

The DX Connexion is an enhancement of the Morley-IAS Dimension panel range, connecting the traditional Morley-IAS qualities of reliability, flexibility and value with advanced features and intuitive functionality.

The multi-protocol DX Connexion range of fire alarm control panels has been developed to be the most time efficient fire panel on the market to install. Simply fix the control panel to the wall, connect the field wiring, power up and in as few as five button presses you can have a compliant, working fire alarm system. The panel's large graphical display provides a clear menu structure making the whole initial set-up process quick, clear and intuitive.

Additionally, programming the control panel couldn't be easier. Complex configuration can be achieved by using either the panel's mobile phone style key pad or by using the Windows PC programming tool supplied with the panel. The flexible PC programming tool also allows text messages for devices or zones to be imported from an Excel spread sheet, saving further time.

## User Interface

Display	6x40 character (240x64 pixels) blue liquid crystal display with backlight illumination
Control Keys	Evacuate, Silence/Resound, Mute Buzzer, Extend Delay, System Reset, Show Alarm Zones
Programmable Keys	2 independent programmable function keys and LED indicators
Programming Keys	12 button alpha numeric key pad inc cancel and return keys plus 4 navigation keys and an OK key
Indicators	Fire, Fault, Disablement, Test, Buzzer Muted, Delayed Mode, Sounders Silenced, Sounders Disabled and Power. Also dedicated fault LEDs for System Fault, Supply Fault and Earth Fault. 40 or 80 LED fire zone indicators optional.

## Protocol Devices

Supports Apollo (Xplorer, XP95 and Discovery), Hochiki (ESP) & System Sensor protocol devices.

Loop Capacity<sup>2</sup>: 500mA per loop

Number of Devices	Apollo Protocol	Hochiki Protocol	System Sensor Protocol

## Networking Features

- Network up to 16 loops (16x1 loop panels, 8x2 loop panels, 4x4 loop panels or any mix up to max 16 loops)
- True peer-to-peer and fault tolerant network for high system reliability
- BS5839 part 1 compliant network

## Panel Features

- Optional 40 or 80 zone alarm LEDs
- Easy 5 key-press set-up
- Large blue LCD display
- Supports USB upload/download
- Mobile phone style keypad and navigation keys
- Option to upload a company logo

## Software Features

- PC configuration software (supplied with panel)
- 80 fire zones (can be used with or without LEDs)
- 7 day timers
- Event logging
- Onboard diagnostics
- Class change function
- Coincidence and verification detection for false alarm management
- Sensitivity adjustment e.g. between day and night
- Input/output logic

## Hardware Features

- Battery backed real-time clock (2 & 4 loop)
- 2 independent sounder circuits
- 500mA multi-protocol loop driver
- 2 x onboard monitored inputs
- Optional programmable keyswitch for selected functions
- Plug-in connectors

### Output Relays:

Fire relay: Single pole changeover 24V DC 1A

Fault relay: Single pole changeover 24V DC 1A

Aux relay: Programmable single pole changeover 24V DC 1A

### Onboard Data Ports:

1 x RS485 (Repeater connection)

1 x PC Programming Port<sup>4</sup>

### Optional Ports:

RS232 third party protocol interface

### Sounder Circuits:

2 output circuits, 1A per circuit.<sup>1</sup>
