[www.honeywellvideo.com](http://www.honeywellvideo.com)

### 32-CHANNEL NETWORK VIDEO RECORDER (NVR)

Honeywell's MAXPRO® NVR SE is an open, flexible and scalable IP video surveillance system. Utilizing Honeywell's high definition cameras, MAXPRO NVR SE is a powerful, high definition IP recording system and viewing client for small to medium size installations. MAXPRO NVR SE is an open platform and supports broad third party device integrations with support for standards—PSIA and ONVIF (including Profile-S devices), real time streaming protocol (RTSP) standard and native device integrations including new 360° camera support. MAXPRO NVR SE provides easy to use desktop clients and mobile apps—MAXPRO® Mobile.

MAXPRO NVR SE comes pre-installed with all required software and is also pre-licensed for 32 channels. This, along with an easy 3-Click wizard to live video for auto configuration, makes installing an IP system quick and efficient without requiring any IT expertise. Simple and logical configuration pages make setup a breeze even for the novice installer.

The MAXPRO NVR SE user interface is based on Honeywell's flagship MAXPRO® VMS user interface which offers a feature rich user experience and is common across the MAXPRO NVR Family. Utilization of this familiar interface allows for the "learn one, know them all" concept that allows for familiarity across a broad range of Honeywell products.

MAXPRO NVR SE supports simultaneous recording, search, and system management for up to 32 IP cameras including high definition formats. Multiple MAXPRO NVRs can be deployed for system expansion using a distributed architecture and integrated with the MAXPRO® Viewer multi-site software or MAXPRO® VMS enterprise video management system.

MAXPRO NVR SE utilizes powerful processor and memory technology supporting multiple simultaneous operations such as video recording and video viewing or alarm monitoring. End users can view live video while simultaneously performing searches. MAXPRO NVR SE also offers advanced features. Honeywell's patented Video Surround feature provides the ability to track subjects of interest as they move between areas covered by adjacent cameras by simply double-clicking on the panel where the subject is currently visible. Features such as the powerful calendar, preview search options and film strip view allow for rapidly searching video for scenes of interest and then quick export method transfers video to an authenticated video clip playable through Windows Media player.

#### Market Opportunities

The continual growth of IP networks and the demand for high definition video have led to the need for convergence of building security systems and IT systems for many companies across the globe. This has resulted in a strong demand for an all-IP end-to-end security system deployment. MAXPRO NVR SE provides an open, flexible and scalable system with operational power to address the needs of a wide variety of applications including education, commercial, retail, healthcare and many other applications. When the need is for an easy to install, simple to use, and feature rich network video recorder, the solution is MAXPRO NVR SE.

## FEATURES

### Software

- MAXPRO NVR SE allows local or remote operations including live and recorded video monitoring, configuration and system management in a single desktop client interface.
- Support for mobile monitoring clients with MAXPRO Mobile apps.
- Broad device integrations: Honeywell cameras and encoders, third party devices with support for standards—PSIA and ONVIF (including Profile-S devices), RTSP standard and native device integration including new 360° camera support.
- Feature-rich, user-friendly Windows based interface to view HD video and configure system settings.
- Easy 3-click wizard to set up the system with auto-configuration and auto-discovery of IP cameras, recording and monitoring configuration—without any IP video expertise.
- Multi-zoom views on HD video. Example: Zoom in on a cash register in one view of the HD camera while at the same time monitoring the cash operator in the zoom out view of the HD camera.
- Ability to investigate events and alarms by simultaneously viewing alarm videos at various stages. For every alarm, users can view the video captured during pre-alarm, on-alarm, and post-alarm, and also view live video from the camera which triggered the alarm.
- Enriched video viewing experience through the intuitive video rendering engine that optimizes CPU utilization by altering the video frame rate.
- Honeywell's patented Video Surround feature simplifies the process of tracking subjects through a set of surrounding cameras.
- Create, save and name salvos under My Salvos or Shared Salvos.
- IP PTZ control and digital zoom on fixed cameras. 360° immersive viewing experience providing heightened situational awareness and increased video surveillance coverage.
- Fast search by date/time, time line, time jump, bookmarks, calendar, preview, film strip view and events. Increase productivity with more efficient search/investigation: Get to the relevant video in few clicks without having to review hours of recordings.
- Event history and operator log reporting with export in .pdf, Crystal Reports, Excel or Word.
- Capture and export clips and still images in simple .wmv and .bmp formats.
- Clips signed with digital signature for authentication.
- Supports multiple client connection to NVR Server.
- Separate event video and general recorded video retention times.
- Email notification on camera, system and operator events.
- Role-based operator privileges supporting Windows and local users.
- Flexible Motion detection (VMD) options with Server (Smart VMD) or Camera based motion events support. Reduced false alarms with object based motion detection analytics with Smart VMD.
- Keyboard control with UltraKey Plus and UltraKey Lite over Ethernet.
- Local and multi-language support.
- Multi-site support with MAXPRO Viewer.
- Integration with MAXPRO VMS.
- Integration with WIN-PAK® and Pro-Watch® Access Control Systems.

### Hardware

- Record and monitor up to 32 channels at 960 fps @ 4CIF/VGA or 960 fps @ 720p HD or 640 fps @ 1080p HD per MAXPRO NVR SE. Network bandwidth/throughput supported per NVR with Incoming: 120 Mbps, Outgoing: 120 Mbps providing a Total: 240 Mbps.
- Includes HDMI and DVI-I/VGA ports for dual monitor support
- MAXPRO NVR SE supports displaying 16 cameras at one time, greater numbers of cameras can be displayed by adding additional client workstations
- 6 removable bays with 1 operating system & storage hard drive and 5 storage only hard drives (optional 1 TB, 2 TB, 3 TB or 4 TB drives)
- Internal storage capacity from 1 TB to 24 TB
- Includes dual 1 GB Network ports optimized to separate record and viewing data to ensure 100% recording and smooth playback even with multiple client connections
- 2U rack mount form factor with locking front bezel. Optional rack rails available for use with four post racking systems
