

Datasheet

READER, INTERCOM POSTS/ SSP Range - Stainless Steel Posts

Product description

With an understanding that aesthetics and practicality are equally important, the CDVI range of posts are suitable to fit in any non-coastal environment to complement and optimise any access control or automation project.

Where aesthetics are important, the stainless steel range includes models to cater for car, wheelchair and pedestrian users. This range is manufactured from high grade stainless steel and has a polished and hardened grain finish.

The SSP range are stainless steel posts meeting pedestrian height ([SSP-PED](#)) and wheelchair height specifications ([SSP-DDA-CAR](#)).

Key features

- High grade stainless steel post
- Pedestrian and wheelchair height
- Base plate available (RPSS-COLLAR)
- Suitable for external use
