

MAXPRO® VMS & NVR SOFTWARE SUPPORT

Agreement Program for EMEA

SOFTWARE SUPPORT

Honeywell offers a variety of Software Support Agreements (SSAs) for our access control and video surveillance products to help protect your investments and those of your customers. These agreements ensure your customers have the latest Honeywell software releases to minimize your support costs.

These service offerings compliment any Honeywell installation and enhance long-term customer satisfaction. By maintaining an SSA, you are eligible for a variety of productivity enhancing benefits.

STANDARD SOFTWARE SUPPORT AGREEMENT

Software Upgrades. Continuous holders of SSAs are entitled to all software upgrades as well as interim service packs on covered software. Honeywell's Professional Support Services are available to assist with system upgrades at prevailing Time and Materials rates.

Priority Integrator Technical Support.

Leverage our deep knowledge base with Honeywell technicians to answer questions and resolve technical issues. Sites with standard SSAs receive priority service during regular business hours.

Dedicated Phone Support. Integrators protected by an SSA have a dedicated phone number to use for contacting Honeywell technical support to expedite issue resolution.

Honeywell Online Training. Available online at honeywelldiscovertraining.com, Honeywell's Discover eLearning courses are loaded with tips and techniques, technical product information and valuable presentation guides to help you stay informed, work smarter and stay ahead of your competition.

Unique Site Identification. Covered sites receive a unique site identification code that enables Honeywell technicians to maintain a history of the site's installations to more quickly identify and resolve issues.

Discounted On-site Support Services. Honeywell's technical staff provides an added layer of expertise. We can provide installation and expert support to supplement your staff. This flexibility enables you to reduce your time and effort while still providing complete technical support to your customers.

Discounted On-Site System Optimization. You have access to highly skilled support professionals who will periodically perform maintenance functions, run diagnostics and make performance enhancements to help ensure systems are running at peak performance. The System Optimization Service is customized specifically for each site based on the complexity and number of servers. If on-site support is required, that portion of the service is provided at a discount. For complete details about the program, please refer to the Professional Support Services brochure.

SUPPORT FOR SITES WITHOUT SSAS

Out-of-warranty software upgrades are not available without an SSA in place. For those sites, standard support is available at prevailing Time and Materials rates. Standard support provides best effort telephone technical support during our normal support hours of 9:00 am - 7:00 pm, Monday through Friday.

The Honeywell SSA program is supported by our expert staff of service technicians who are readily available whenever you need it. Additionally, our telephone technical support resources are supplemented by our extensive online technical libraries available at mywebtech.honeywell.com and [Honeywell Help & Support YouTube channel](#). Here you can find how-to-videos, documentation, FAQs, workarounds, nonstandard configurations, and more.

SOFTWARE SUPPORT AGREEMENT REINSTATEMENT

Software that is not currently under an SSA will be charged a reinstatement fee.

If you wish to purchase SSA coverage for systems not currently covered, those systems may be subject to an additional charge for upgrades to the latest software version prior to commencement of coverage or to bridge any uncovered time since the product warranty expired. This requirement may apply to hardware upgrades as well.

PRODUCTS NOT PURCHASED FROM HONEYWELL

Telephone technical support is occasionally requested to provide assistance on hardware and/or software products purchased from third parties. Honeywell's technical support will attempt to provide assistance upon request. All technical support assistance for such support requests will be billable under prevailing Time and Materials rates.
