

	Intruder	Access Control	CCTV	Fire	General
TR Range		●		●	

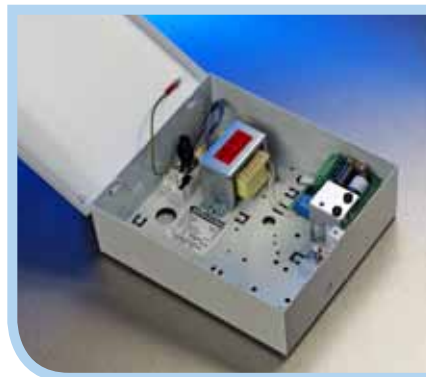

Overview

The TR range has been specifically designed for fire and access control applications that require remote control of the power supply output. A typical example would be to power door retainers, with a link to the fire panel in order to switch off the output to the doors in the event of a fire alarm activation.

This range is not suitable for use with standby batteries.

Features

- 27V dc nominal output
- Remote control of output
- Choice of switching options:
 - Closing of a normally open volt-free contact
 - Application of an external 24V dc supply such as a sounder circuit
- LED indication
- Mains transient protection
- Screen printing available
- 3 year warranty

Description

Part Number	Amp Rating	Box Size
TR2	2.0	A
TR4	4.0
