

Fingerprint Recognition

ievo ultimate™

A CPNI-certified fingerprint scanner equipped with a high performance multi-spectral imaging sensor. Suitable for indoor or outdoor usage.

ievo micro™

An indoor-only fingerprint scanner for small to medium sized facilities. The high quality optical sensor delivers a fast and reliable biometric security solution.

Facial Recognition

ievo iface™

An advanced facial recognition terminal that identifies, analyses, and verifies a face in just one second. For fully touchless access control in indoor settings.

What else do I need?

You **must** have:

1 Interface Board per 2 readers

This is where users' fingerprint templates are stored. Install on the secure side of the door.

You need to **choose**:

Mains power or PoE?

You will need at least 2A available on DC power, and an ACU network bridge.

Optional extra features?

Spoof detection and AES128-encrypted data transmission can be toggled on and off.

You **must** have:

Mains power or PoE?

You will need at least 2A available on DC power, and an ACU network bridge.

Optional extra features?

AES128-encrypted data transmission can be toggled on and off.

What else do I need?

You **must** have:

Stable power supply

iface requires a 15Vdc power supply with a minimum of 2A current.

You need to **choose**:

Standalone or networked?

iface can work as a standalone unit, or networked into an access control system. For a networked system, you will require a CAT5 Ethernet cable.

Fingerprint Recognition

ievo ultimate™

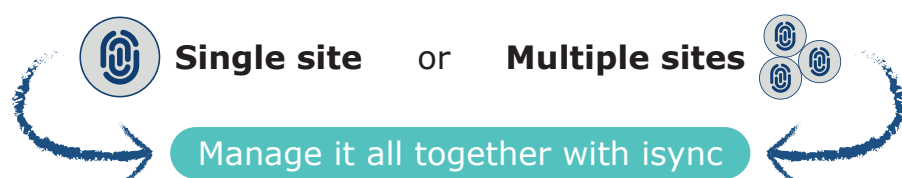

Optional **extras** include:

- Desktop USB reader**
for easy enrolment away from live reader sites
- HID SE iClass card reader**
as a backup in case of problem fingerprints
- Optional spoof detection**
for ISOPAD Level 1 security compliance
- Flush mount kit & weather shields**
for flush finish or outdoor installation

Software & Integration

You will also need **ievo isync** software. isync allows you to use ievo fingerprint readers with online access control systems.

ievo micro™

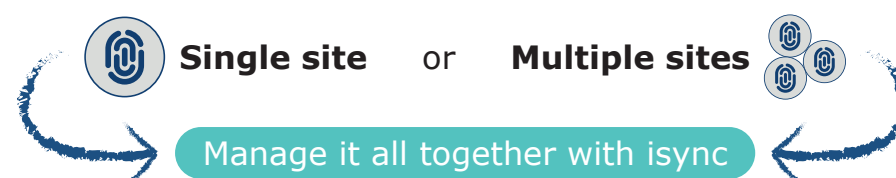

Optional **extras** include:

- Desktop USB reader**
for easy enrolment away from live reader sites
- HID SE iClass card reader**
as a backup in case of problem fingerprints
- Optional spoof detection**
for ISOPAD Level 1 security compliance
- Flush mount kit**
for a neat and tidy flush finish

Software & Integration

You will also need **ievo isync** software. isync allows you to use ievo fingerprint readers with online access control systems.

Facial Recognition

ievo iface™

Optional **extras** include:

- MIFARE® DESFire® EV1 reader**
built-in as a backup in case of problems
- SIM card slot**
if you want to add or move memory storage
- Tripod mount socket**
for a freestanding biometric solution

Software & Integration

Off-the-shelf integrations via isync with major access control manufacturers:
