

EM SERIES

Emergency Door Release

Range: EM Series

The EM series of emergency door releases provide emergency unlocking of doors which are secured by electrical locks.

Two models are available:

The EM200GDB is a traditional "break-glass" unit, whereby the safety glass breaks when pressed and needs to be replaced to reset the unit.

The EM201GDM is a "resettable" unit, whereby the safety glass is dislodged when pressed and can be reset back to its normal position by use of a reset key.

Both units are double pole as standard - this allows for the control of the lock and provides a signal for monitoring of the unit if required (activate a sounder, trigger to an access control device etc).

The EM series are supplied complete with a back box for surface fitting, but by removing the back box they can be fitted flush onto a standard UK back box. Full instructions are included.

Replacement glass for the EM200GDB and spare keys for the EM201GDM are available on request.

- **Emergency unlock**
- **Break-glass or resettable**
- **Double pole as standard**
- **Flush or surface**
- **Fire officer compliant**
- **2 year warranty**

All doors which are designated as fire exit routes require an emergency door release. Please check with the local Fire Officer to ensure compliance.

Technical specification

Dimensions, flush	85 x 85 x 25mm
Dimensions, surface	85 x 85 x 58mm
Switch Output	Double pole
Switching current	3 Amps @ 12VDC
IP Rating	Internal use only
Warranty	24 months return to manufacturer
Compliance	CE, ROHS & WEEE
