WE INNOVATE SECURITY

Professional security

Residential

UNii, professional security

Your home should be a safe place. A place you feel comfortable living your life, together with family and friends. The UNii can play an important role in feeling safe. Aesthetically designed and invisible in some places, the sensors detect motion, smoke and water leakage to ensure a safe living environment. Professional security that excels in simple operation.

The convenience of wireless

In addition to traditional hardwired sensors, the UNii control panel can also use wireless sensors. Ultimate security without ugly cables. Motion sensors, window and door contacts, smoke detectors and water detectors are all available as wireless sensors.

mySmartControl
Security at your fingertips

Advantages mySmartControl App

Remote control

Manage your home easily with the app. Arm and disarm the system with a single press of a button.

Push notifications

Receive push notifications immediately in the event of an alarm or arming/disarming. Even if your phone is set to silent mode.

Chat function

Communicate easily and quickly with family members using the built-in chat function. This way everyone is aware of the status of notifications sent.

UNii keyfob

In addition to the app and the keypad, the UNii can also be armed/disarmed with a keyfob (transmitter). With the press of a button the system can be armed or disarmed. The status of the system is visible in real time on the keyfob itself.

Fire

The UNii is not only used for intrusion detection, but is also ideal for fire detection. Easily expand the system with reliable wireless or wired smoke detectors and you will be warned in time in the case of a fire alarm.

Modular, focused on the future

The UNii has a modular structure. This means that later expansion is always possible without having to replace the control panel. An extra smoke detector in the attic? No problem! The system can support up to 64 wireless components. This way it's always possible to adjust the system to future needs and expectations.

Applicable:

● Residential house

● Apartments

● Vacation homes

About Alpatronics

The UNii is developed and produced by Alpatronics. A Dutch company that has been the specialist in intrusion detection and security products for decades. Solutions are designed in collaboration with customers and end users. This way the solutions fit seamlessly with the changing demand of the user. Safety, user-friendliness and simple installation have been core demands for the development of the UNii. Dealing directly with the manufacturer that can provide direct support, the UNii is a perfect solution for every security need.
